Section A-A

Fixing Hole Locations
(Fixing bolts not included)

Normal Operation (Unlocked)

Locking Option 1

When installed one way, after locking the handle the lever will turn 90° to allow the window to tilt, it will go no further and will NOT allow the window to open fully.

Locking Option 2

Turning the handle body 180° and installing the handle again will mean that when the handle is locked the lever will not turn at all leaving the window fully locked and unable to be opened.
