Section B-B

Section A-A

This product is supplied with solid brass woodscrews and one steel screw, the steel screw is intended to be used to cut the thread prior to fixing the door furniture with the brass woodscrews.

We recommend the drilling of a small pilot hole into the solid wood doors to avoid sheering the brass screw heads. The use of power screwdrivers is not recommended as these can damage the finish or shear off the brass screw head by slippage or excessive tightening of the screw.
