Performance

The status we want
to achieve.

Born on the rugged shores of Cornwall back in 2003, but opening doors and windows globally, Coastal Group is a family owned business which specialises in the design and manufacture of precision-made hardware solutions for external doors and windows.

We continuously innovate in the design and manufacture of every piece to ensure it enhances the look and improves the performance and durability of the doors and windows they're fitted to.

Consistently. Every time.

Loren Jenner

Managing Director, Coastal Group

DURATIQUE™ - Your Ultimate Antique Hardware - Made from Stainless Steel.

DURATIQUE™ brings you many benefits:

- No more issues of rusting black antique hardware - manufactured from a base material of Stainless Steel to prevent it corroding.
- DURATIQUE™ has been successfully Salt Spray Tested to Class 5.
- Ideal for use where corrosion levels are high such as coastal environments and with acidic timber.
- No more inconsistent product making it time consuming to fit - CNC machined fixing screw and lever locations. This ensures they're in a consistent location - enabling you to batch produce the doors and fit the hardware quicker.
- No more sagging handles and rattling spindles - high quality dual sprung mechanism and spindle ensures a nice positive action and returns the handle consistently to its original position.
- Part of a suited range of antique door hardware made from stainless steel.

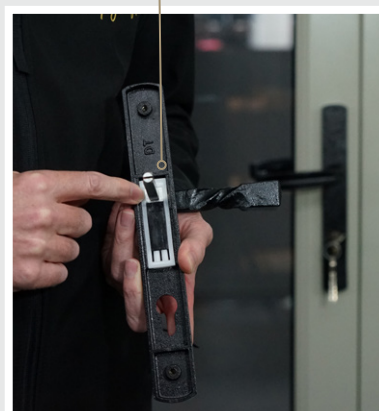

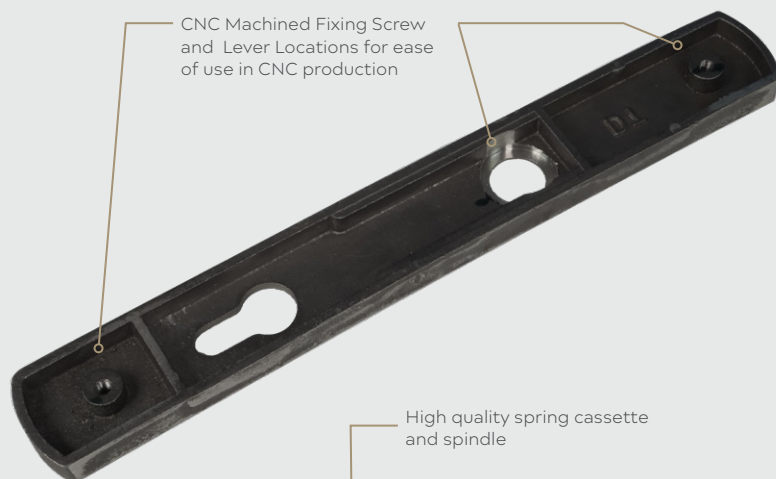

The DURATIQUE™ brand is owned, manufactured and sold by:

HOW WE CAN HELP YOU

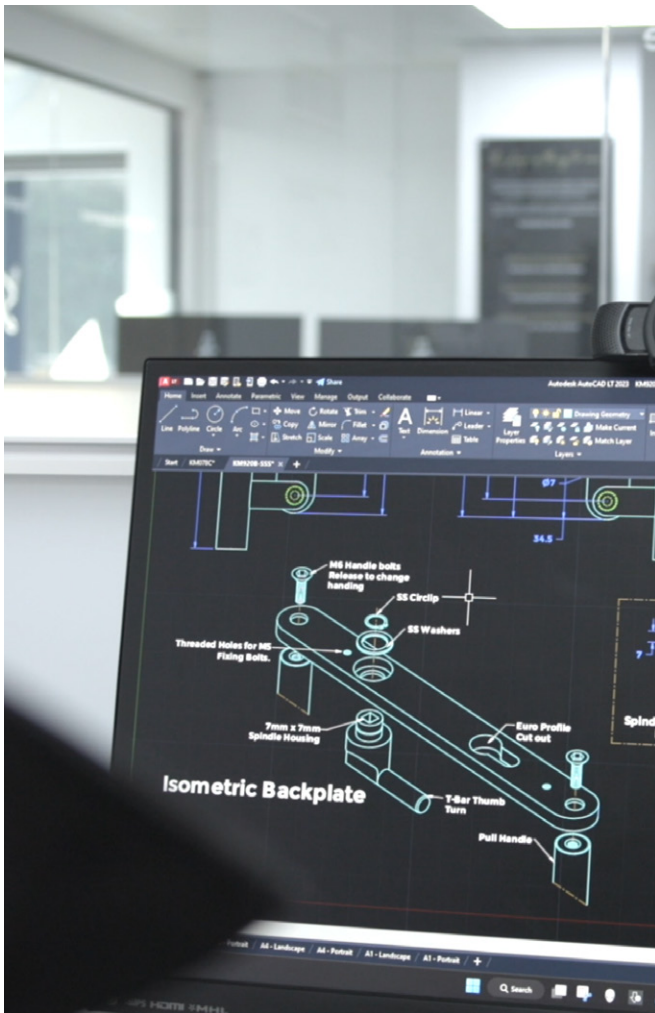

Bespoke Solutions

Looking to source the right door or window product to fulfil your need, or one which meets your high performance standards? We're versatile and tailor our way of working to suit your individual needs.

Through combining our skills and capabilities we work with many large system houses, high-end joinery manufacturers, fabricators and architects to provide tailored products and solutions, like we can for you, as and when needed.

We're clear and focus on your priorities, and always aim to deliver the best possible solutions in the easiest possible way. How? By focussing not just on 'doing good', but also on 'feeling good' and caring about what you want, delivering it in the most appealing way.

Design and Development

We're constantly scouring the marketplace for new consumer trends, end-user needs and technological advances, as well as keeping up to date with the latest regulations. Where existing door and window hardware and designs have become outdated or no longer meet changing customer needs we work to provide you solutions.

Through perpetual innovation our Research and Development Team are always working to move the door and window industry, and your business, forward by being ahead of the curve in terms of materials, products, fixtures and finishes.

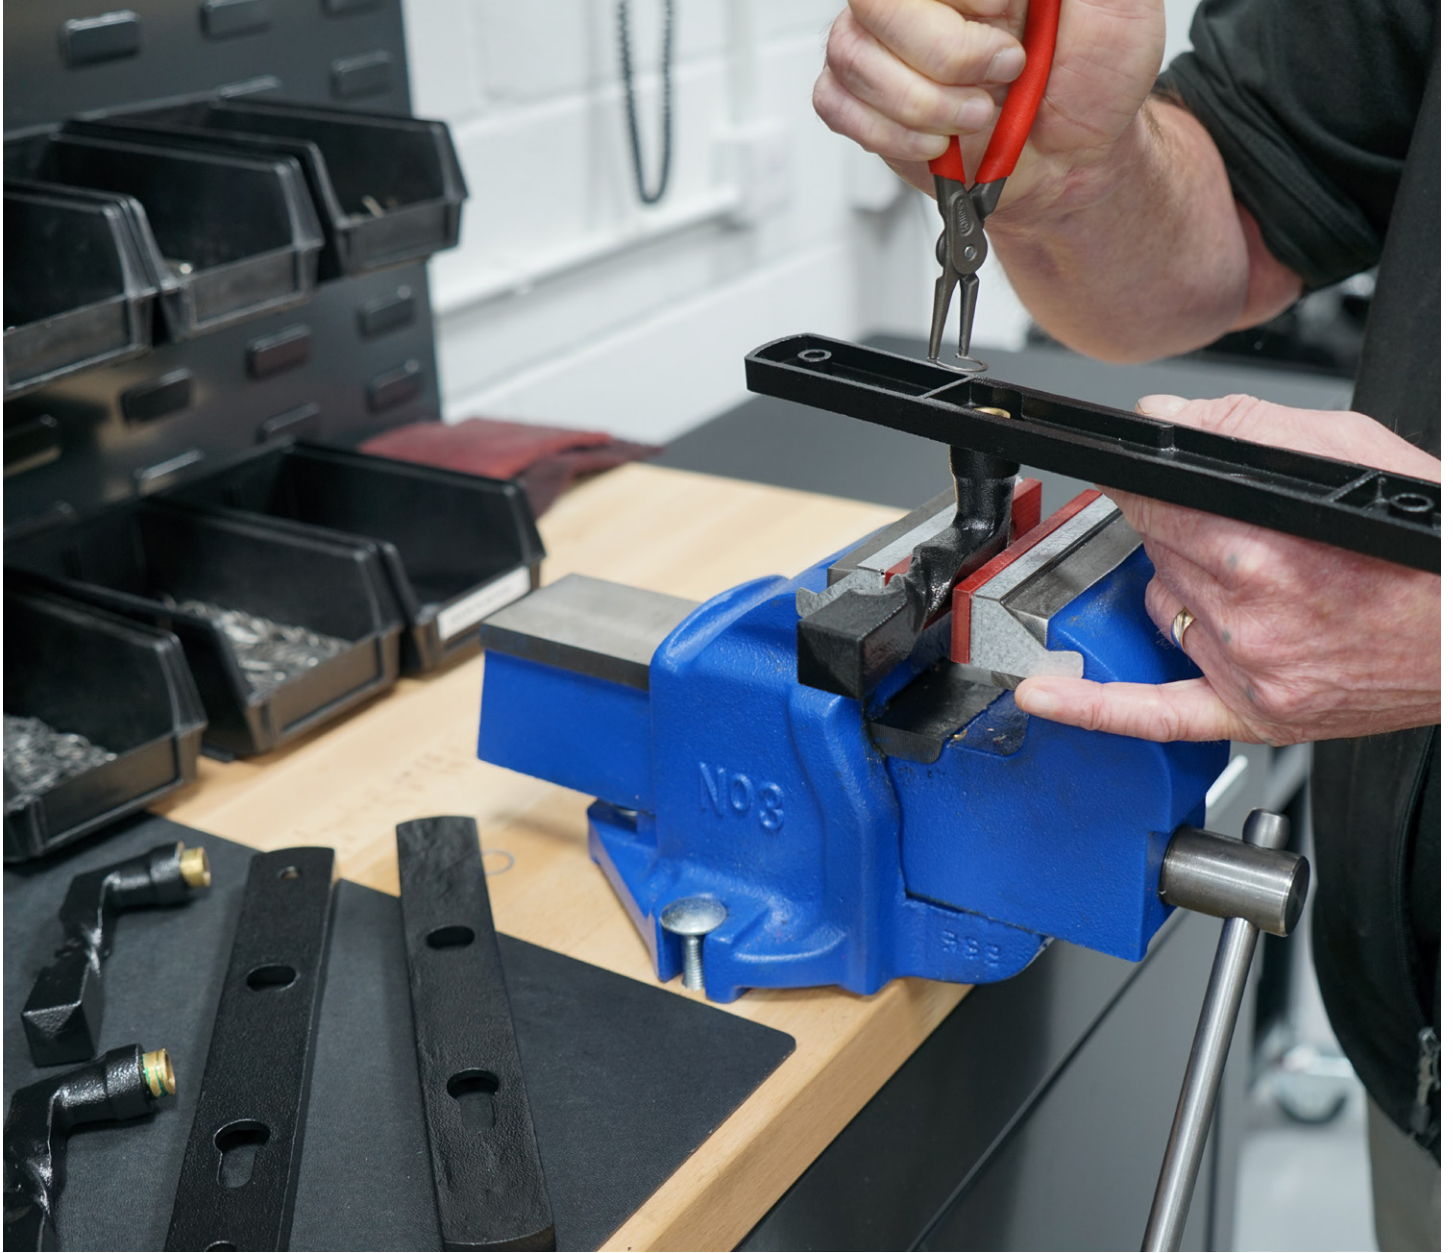

Long-term value is what we design, develop and deliver to you.

Next Day Delivery

Great Service and Fast Delivery are as important to you as they are to us and we continue to invest to provide you with an industry-beating service. Our new Distribution Centres and Warehouse Management System have enabled us to increase and improve our stockholding and our 'On Time In Full' delivery service.

All of our core product range is held in stock for fast delivery. All stock item orders placed before 3pm are dispatched the same day and are usually delivered the next working day. If required, your delivery can be sent straight to site or an alternative location, e.g. to your client.

In-house Design and Build - Delivering You Quality

We're fanatical about ensuring our door and window hardware provides ultimate lasting performance. To ensure we deliver you hardware which lives up to our brand values, and doesn't let your brand down, we retain control of each step of the process - from design, to sourcing quality components from around the globe and build of the product.

Our range of door and window hardware designed and built in-house in the UK from components manufactured by specialists around the globe continues to grow - providing you with peace of mind that you're purchasing quality hardware from a stable supply chain.

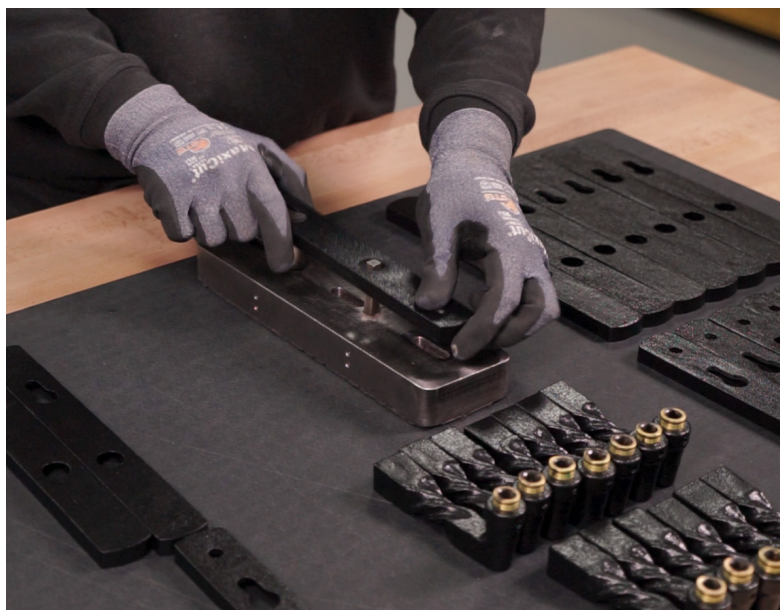

Some examples of DURATIQUE™ products built in-house

Our team of trained technicians are dedicated to ensuring the products we deliver live up to our vision of:

- Perfect Fit Guaranteed
- Superior Standards Always
- Ultimate Lasting Performance

Shown here are our DURATIQUE™ Lever Door Handles going through assembly and final quality checks.

Once passed and approved they're packaged up and our 'Quality Seal' is applied, ready for delivery.

The People Behind the Brand

Our team of hardware specialists are here to help and provide you with the best solution for your project.

As a customer said *"Coastal actually care, they know what they're talking about and can give you advice".*

The benefits of using Stainless Steel instead of Iron for Antique Hardware

Black Antique hardware has always traditionally been made from iron. This is one of the biggest causes of failure in antique hardware.

As a ferrous metal, iron is susceptible to rusting so as soon as it is used on external hardware and exposed to the elements the deterioration begins. The hardware soon not only fails but causes rust streaks and staining down your door.

Stainless Steel on the other hand is a steel alloy metal containing chromium. The chromium reacts with the oxygen in the air and forms a protective layer that makes stainless steel highly resistant to corrosion and rust.

This makes stainless steel a much more suitable material for manufacturing external hardware from. It is why we use stainless steel as the base material for all of our DURATIQUETM Hardware, NOT iron.

The stainless steel base material of DURATIQUETM Hardware combined with an electrostatic polymer top coating has enabled us to achieve a world class corrosion resistance rating for Black Antique Hardware of Class 5 in a Salt Spray Test.

So wherever your doors and windows are installed, by fitting DURATIQUETM hardware you can have peace of mind.

CO7100C

Barley Twist

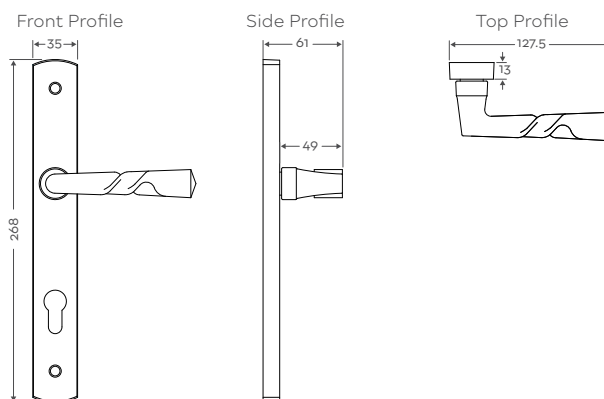

Lever Door Handle

- Narrow backplate with traditional 'barley twist' design lever handle.
- Suitable for multipoint door locks.
- Made from stainless steel base material to prevent it corroding.
- Class 5 Salt Spray Tested
- Heavy duty spring cassette for a solid, dual lever action
- Durability tested to BS EN 12217:2003 - 200,000 cycles
- Stainless steel fixings to match finish of handle
- Designed and Built in the UK
- Complete with fixing pack for door thicknesses of between 44-68mm.
- Back plate CNC machined to ensure consistency of screw holes and handle centres.

Hardware Product Care and Maintenance

To help you care for the DURATIQUE™ hardware range please follow the guidelines below.

During installation and whilst building work is being carried out the hardware should be covered to protect it from dust, dirt and scratching.

Immediately after fitting and installation

- Product should be cleaned using a soft cloth and mild soapy water then dried immediately with a clean, soft cloth.

Monthly Care and Maintenance

- Clean regularly with a soft, dry cloth or duster.
- Product should be washed monthly using a soft cloth and mild soapy water then dried immediately with a clean, soft cloth - especially if fitted on or near the coast.
- Fingerprints can be removed by washing product as above.
- The above procedure should be followed with an application of good quality, non-abrasive car wax polish, gently applied, to protect the finish.

Six Monthly Care and Maintenance

- Lubricate any moving parts with a suitable PTFE Grease such as GLS200 available from www.coastal-group.com.

Please Note

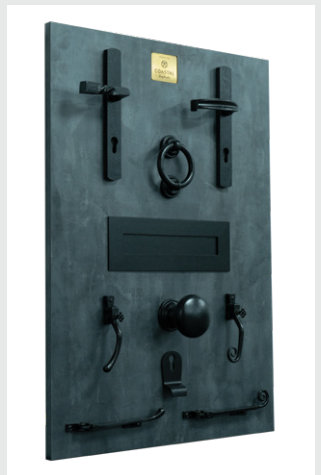

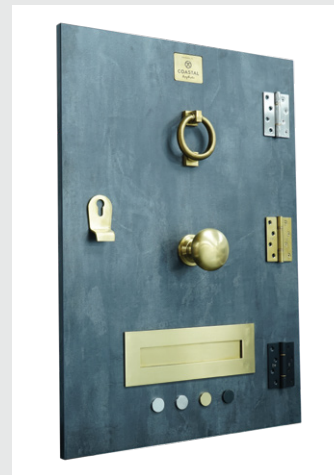

- DO NOT use oily rags or greasy cloths when wiping the product surface.
- DO NOT use bleach, abrasive cleaners, caustic or acid based cleaning materials, or detergents containing chloride, or any other strong household cleaning products.
- DO NOT use abrasive materials, files or other hard objects against the product surface.
- This product should be protected from dust and dirt during any construction work.

Marketing Resources

Ask about our marketing resources available including Showroom Display Boards, Posters, and high quality product images for your brochures and website.

Contact us on sales@coastal-group.com or 01726 871 025 to discuss your requirements. Or visit our website to download CAD files, data cards and product images.

"Coastal's range of premium hardware accessories is the ideal finishing touch for our high-end timber core composite doors. Aesthetically, the products look fantastic, they are perfectly in tune with consumer trends and can be styled to create a range of looks from traditional to ultra-modern."

"The service we have received from Coastal when promoting their range of premium hardware accessories is first class. Product images, promotional copy and samples are always readily available. The sample boards that Coastal manufacture have been a fantastic addition to our own retail showroom."

Hints and Tips to Improve your Project Photography

Do you struggle with taking good photos that showcase the quality of your work? We all fall into the same trap but making a few small tweaks can make a huge difference to the quality of your photograph. We've listed below some points we've found helpful during our own photoshoots.

Adjusting the image resolution on your phone/camera

- Use the best quality image settings on your phone/camera.
- When sending the photos, please make sure to email them as original files without reducing file size.

Include as much as you can within the photo

- Holding your phone/camera landscape instead of portrait. Simply turning your phone/camera on its side gives more of an area to work with your photo.
- Try and include as much of the house or room in a shot as possible to allow your viewer to understand the concept of your work better.
- Frame the door/window so that there's some extra space around it. This gives the building context and will focus the eye on your work.

Photograph from an angle

- Taking the photograph from an angle shows the architectural lines and gives more dimension.
- Choose your angle, kneel down, and take the shot upwards – a shot taken around 100cm from the floor is best. An angled view taken low and from the side will also make a great shot.

Stabilise your phone/camera by resting it on an object

- Try resting your phone/camera on something, this will help keep the angle straight and stop it from shaking/blurring.

Watch out for any reflections in your photos

- Try not to catch yourself or any of your equipment reflecting in the glass.

Be mindful of the weather forecast and avoid using the flash

- Sunshine and blue skies showcase your work at its best. If you are outside and have an outside light source use it, as it will highlight your work. If you are indoors then use as much natural light as possible; open blinds, curtains, etc. and turn the lights on. Whether indoors or out, ensure that your light source is behind you. Avoid using the flash as it tends to result in an awkward reflection or a bad glare.

Remember to tidy up before you take a photo

- Cleaning the doors, windows and hardware and tidying up both inside and outside before you take your photo will create a much better photo and showcase the quality of your workmanship.

Take as many photos as you can

- Taking multiple photos will give you a variety to choose from and capture your work from different perspectives. The first photo you take is often not the best one.

CO7200C & LP400 DURATIQUÉ Door Handle and Letter Plate in Devon

This property in Devon isn't far from the coast. The owner wanted to keep a traditional look and feel to their property but without the issues that typically come with Black Antique hardware made from malleable iron.

With this in mind, our CO7200C DURATIQUÉ Door Handle and LP400 DURATIQUÉ Letter Plate were fitted to this Solidor 'cottage style' door.

Made from Stainless Steel, our DURATIQUÉ Hardware Range provides a traditional antique look and feel but with modern, high quality performance and durability. The stainless steel base prevents corrosion and the screw holes and handle centres are CNC machined for consistency.
