BLU - Your Benefits

DESIGN

Designed to enhance the aesthetics and performance of your external doors and windows and set them apart from your competition.

INNOVATION

We're constantly looking at ways to improve the product offering and performance and create new solutions to meet your needs.

DURABILITY / LONGEVITY

The BLU product range is made from 316 Marine Grade Stainless Steel as standard. Helping resist long term corrosion and keeping your doors and windows looking better for longer.

FINISH

We include an additional finishing process during manufacture to create a consistent finish and quality feel.

COMPREHENSIVE RANGE

A full suited range of quality hardware across your doors and windows.

VALUE FOR MONEY

Excellent lifetime value, providing you with quality you can afford.

LIFETIME GUARANTEE

Guaranteed to last as long as the door or window the hardware is fitted to. Providing peace of mind.

The benefits of using 316 Marine Grade Stainless Steel

Where corrosion levels are high, such as coastal environments and in acidic timber, commonly used metals such as zinc and 304 stainless steel are not able to stand up to the elements and corrosion can quickly start.

However there are many corrosive elements in the atmosphere wherever your doors and windows are, situated on the coast or in a city.

316 Marine Grade Stainless Steel is stronger and has higher levels of corrosion resistance than 304 Stainless Steel. That is why we use 316 Marine Grade Stainless Steel as standard on all BLU™ products.

So wherever your doors and windows are installed, by fitting BLU™ hardware you can have peace of mind your hardware will last at least as long as your doors and windows.
