

HINGES AND PIVOTS

BUTT HINGES

Full Leaf and Half Lift-off Hinge Handing

HX501 and HX507 are handed products - the hinge leaf with the pin is fitted to the frame, the other half with the receiving hole is fitted to the door, allowing the door to be lifted off.

To define hinge handing, view the door with the hinge knuckle facing towards you; if the hinges are on the left then these are left hand hinges as per drawing shown above.
