Installation Instructions

1. Drill 4 holes (2 either side of the window upper sash internally), 2 x 15mm above the meeting stile & 2 x 100mm above the meeting stile using a Ø10mm Drill, 23mm deep.

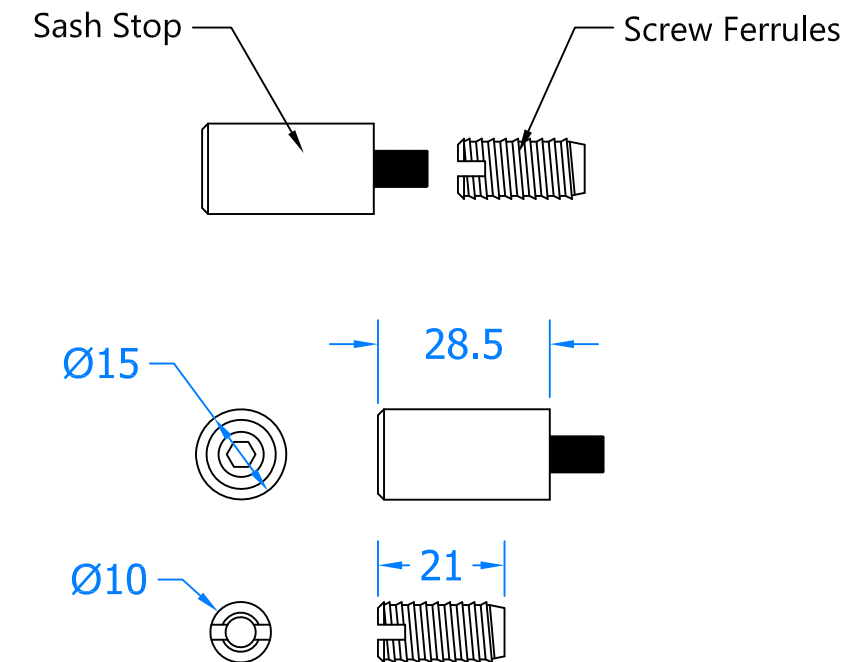

2. Using a large flat head screwdriver, screw in the ferrules into the 4 holes until the head of the ferrules are flush with the timber.

3. Now screw in the Sash stop into the required hole location using the Sash stop key SWS42-KEY which is sold separately.

* these dimensions can be altered accordingly.
