

BLU™

316 Marine Grade Stainless Steel Hardware

HAB2 Inline Round 'T' Bar Pull Handle

INSPIRATIONS GALLERY AND TESTIMONIALS

COASTAL

Shaping the future.

"We are very selective who we work with and go to great lengths to choose suppliers that match our own ethos for high standards in everything we do, as our reputation is only as good as the people we work with.

We were introduced to the BLU™ range of door hardware after we were let down by a supplier. Coastal were able to step in and deliver a great service and great product. We were impressed from the start as they not only got us out of a potential hole but were happy to go the extra mile for us.

From a product perspective you are looking at high quality with the BLU™ range – the marine grade stainless steel is second to none both in terms of styling and performance."

Composite Door Manufacturer

We were looking for something quite special and BLU was the obvious choice to complement the range. Feedback from customers has been fantastic, especially the fact it is made from 316 Stainless Steel.

System House

RP Joinery's client owned a house directly on the seafront in Whitstable. They had experienced issues with their previous door due to the extreme coastal environment causing the hardware to corrode and deteriorate. The only way to stop this corrosion happening to their new door was to specify our range of BLU 316 Marine Grade Stainless Steel Door Hardware.

COASTAL

Shaping the future.
